Subject: Application for acceptance of Class II permissive changes made to TransmeterWater, model TMW-40D, FCC ID: NTAXMETER3, date of grant: October 14, 2002.

Please find below our explanation:

No changes in TransmeterWater itself were made. The device was retested in three new installation variants:

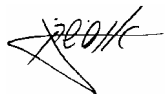

- a) with foil sticker, in plastic enclosure which contained plastic cover and plastic lid;
- b) with foil sticker, in plastic enclosure which contained plastic cover without lid,
- c) with foil sticker, in plastic enclosure which contained concrete cover with metal lid.

The obtained test results show that the device in these installations meets all the requirements of the grant, issued for NTAXMETER3. These installations represent worst-case scenario.

Therefore we apply for the following change in Grant Notes:

To change the last sentence by deleting the following words: "...and a partially metal lid ..."

Sincerely yours

Roman Sternberg
