Re.: Equipment Authorization - Change in the identification

Dear Sirs,

The Digianswer Bluetooth PCMCIA Card (type number: BTPCM101, grantee code: O2OBTPCM101) will also come into the market as an OEM product by our customer Toshiba Corporation. The system will be identical except of the label. Toshiba's grantee code is O2YPA3053-1PCC.

The authorisation of the original Digianswer system was started on 29.05.2000. Toshiba's OEM authorisation started parallel on 06.06.2000. Both application were submitted by our authorized agent 7layers AG, 40880 Ratingen, Germany, contact: Torsten Lohoff.

The test results of 7layers FCC Part 15.247 test report no. 4-F0003a/00 are also applicable because the only difference is the identification label.

Toshiba's label layout will be transmitted as a separate file as soon as it is available.

Thank you very much

With kind regards

for Digianswer A/S

Tom Ringtved
