Mr. Joe Dichoso
Federal Communications Commission
Authorization and Evaluation Division
7435 Oakland Mills Road
Columbia, MD 21046

Subject: FCC ID: OBATF-400

REFERENCE: 731 CONFIRMATION NUMBER EA92514

CORRESPONDENCE REFERENCE NUMBER: 6238

Dear Joe:

With reference to your request, I have attached a sketch of the FCC ID Label Location. The clip is removable so I believe that the end user would still be able to read the FCC Identifier in that location. They will put the warning statement on the device below the label.

The antenna is bolted to the PCB and the Front half of the case and is further held in place by the back half of the case. The antenna cannot be removed by the end user. To remove the antenna would render the transceiver inoperative.

I am also sending a new page 6 of the report; it has been revised.

Should you have any questions or require any further information, please advise.

BEST REGARDS,
Sid Sanders/TIMCO ENGINEERING, INC.
