Compliance Information:	3

Getting Started

1 Install the batteries in the device

The device uses two AAA batteries; alkaline batteries are recommended. Do not use old and new batteries together or alkaline, standard, and rechargeable batteries together. **IMPORTANT:** If the device has been exposed to cold temperatures, allow it to warm to room temperature before you insert batteries. Otherwise, you may damage the electronic components.

Remove the cover and insert two AAA batteries into the battery compartment. Make sure that the negative end of each battery is pressed against a spring. Then, reattach the cover.

Maintenance And Troubleshooting

The base will attempt to automatically schedule updates to the SBACCEL when it is idle, but due to unforeseen scheduling this may not always be when it is not in use. The update process takes approximately 5 minutes and no data will be recorded during that process.

Recycling Information

This electronic product must not be disposed of in municipal waste. To preserve the environment, this product must be recycled after its useful life as required by law.

Use recycling facilities that are authorized to collect this type of waste in your area. In doing so, you will help to conserve natural resources and improve standards of environmental protection. For information about safe and correct disposal methods, please contact your local city office or waste disposal office, or the establishment where you purchased this product.

Compliance Information

United States Compliance Information

FCC ID: OMCSBACCEL

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC CAUTION: To assure continued compliance, use only shielded interface cables when connecting to computer or peripheral devices. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

IMPORTANT: To satisfy exposure compliance requirements, the antenna and transmitter of the device must be at least 1.5 in. (4 cm) from all persons and must not be near or connected to any other antenna or transmitter.

Canada Compliance Information

IC: 3673A-SBACCEL

HVIN: SBACCEL

IC INFORMATION

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions: 1. This device may not cause interference. 2. This device must accept any interference, including interference that may cause undesired operation of the device.

IMPORTANT: To satisfy exposure compliance requirements, the antenna and transmitter of the device must be at least 1.5 in. (4 cm) from all persons and must not be near or connected to any other antenna or transmitter.
