

Safety Human Exposure – Radio Frequency Exposure Compliance		Pass
Test Specification : RSS-102 Issue 5		
Requirement	: SAR evaluation is required if the separation distance between the user and/or bystander and the antenna and/or radiating element of the device is less than or equal to 20 cm, except when the device operates at or below the applicable output power level (adjusted for tune-up tolerance) for the specified separation distance defined in Table 1 in RSS-102 Issue 5.	
According to table 1 in RSS-102 Issue 5, below exemption limit is applied		
	<ul style="list-style-type: none">- Frequency: 2450MHz- At separation distance of $\leq 5\text{mm}$- Exemption limits: 4mW	
Results	: max. power of channel = -4.64dBm = 0.344 mW (e.i.r.p.)
