Attn: Director of Certification

### Class II Permissive change to OOANRT302

Due to an error in the fundamental field strength measurement for the RFID part of the above certified device, the field strength indicated in the test report for the original certification was incorrect. At the FCC's request (see KDB enquiry number **703014**) a Class II permissive change is now requested, to correct this error in measurement by the test house, and report the correct field strength at the 13,56MHz fundamental frequency.

Dated this 11<sup>th</sup> day of August, 2015.

Sincerely,

By:  \_\_\_\_\_ George Mayne
