P25^P Conventional

MASTR® III P25 Station 800 MHz

The MASTR III P25 digital Base Station, built on the tradition of the popular MASTR series of repeaters, is an industry leader in interoperability, performance, and reliability. The MASTR III P25 provides secure digital communications for mission critical applications. The station is capable of both conventional Project 25 digital communications and conventional analog communications for maximum flexibility. The addition of a SitePro Controller provides the capability of delivering Internet Protocol (IP) data and voice to a M/A-COM P25^{IP} network.

Product Overview

The MASTR III P25 provides the flexibility to commission a base station that will meet critical communication needs today and into the future. Whether users are designing a conventional Project 25 system, a conventional UHF system, or an IP-based P25 network, the MASTR III P25 keeps pace with their needs.

Flexible, Efficient P25 Design

The MASTR III P25 incorporates P25 digital voice and data using a digital signal processor modem for maximum design flexibility. The station can be configured for P25 mode, and can communicate with the user's current analog dispatch network through a 4-wire audio port. The P25 digital voice is translated through an on-board voice encoder/decoder in the station to allow immediate access to P25 communications through the user's existing network.

The MASTR III P25 can also be configured for normal conventional analog operation at sites where P25 currently is not in use.

P25[™] Network

As network needs expand, the MASTR III P25 is ready to grow to meet the communication requirements of the 21st century. The MASTR III P25 and a SitePro Controller enable IP voice and data packets to be sent over a M/A-COM P25^{IP} network and be received at the base station. This setup enables all of the advantages of IP:

- Seamless integration of off-the-shelf IP data applications.
- Easy interconnection of peripherals and ancillary equipment such as mobile data terminals, printers, scanners, and video devices for user organizations.
- Economical routing and backhaul of network data.

 Redundancy benefit of distributed IP architecture, one of the key requirements for most public safety users.

Programmable Flexibility

PC programmable options provide flexibility, simplified setup, and easy field upgrades. The fully synthesized design of the MASTR III P25 base station allows the user to make frequency changes quickly, easily, and affordably.

The modular design of the base station makes maintenance and servicing simple and fast.

General Specifications

Cabinet	INDOOR CABINET (Floor Mount)		
	37 inches (CNV)	69 inches	
Size [in. (mm)]			
Height	37.0 (940)	69.1 (1750)	
Width	21.5 (550)	23.1 (590)	
Depth	18.25 (460)	21.0 (533)	
Weight (min) [(lb (kg)]			
Continuous Duty	150 (68)	520 (236)	
Packed, Domestic Shipping	165 (75)	550 (250)	
Number of Rack Units	17	33	
Max. Units w/Power Supply	1	3	
w/o Power Supply	1	4	

NOTE: One rack unit equals 1.75 inches. Stations occupy 8 rack units of cabinet space.

Service Speaker: 1W @ 8Ω

Service Microphone: Transistorized Dynamic **Duty Cycle (EIA) Continuous:** Transmit/Receive - 100%

Ambient Temperature

(or full spec performance per EIA): -22 to +140°F (-30 to +60°C)

Humidity (EIA): 90% @ 122°F (50°C) **Input Power Source:** 120 VAC (±20%) **Optional Input Power Source:** 230 VAC (±15%), 50 Hz 13.8 VDC, 100 AH (min.) **Standby Battery Source:**

Antenna Connections: Type N Length of AC Power Cable:

10 ft (3048 mm) Metering: Provided through Handset or TQ0619

Utility Software

Altitude:

Operable: Up to 15,000 ft (4,570 m) Shippable: Up to 50,000 ft (15,250 m)

Source Power Drain		800 MHz Analog	800 MHz P25 Digital

Conducted Spurious and Harmonic Emission	-36 dBm	-70 dBc (spurious emission)
Frequency Stability (ppm)	±1.5	±0.15 (external frequency standard)
Modulation Deviation (kHz)		
Wideband	0 to ±5	2.83 kHz nominal per TIA 102 CAAB
15K0F1D, 15K0F1E		
16K0F1D, 16K0F1E, 16K0F3E		
NPSPAC - 14K0F3E	0 to ±5	2.83 kHz nominal per TIA 102 CAAB
FM Noise (dB)	-55	N/A
Channel Spacing (kHz)	25, 12.5 NPSPAC	25
Frequency Spread Full Spec (MHz)	1.0	1.0
Audio Distortion (@ 1 kHz)	Less than 3%	Tx mask 47CFR90.210d
Number of Channels (Conventional)	Up to 16	Up to 16
Audio Response (pre-emphasis)	Within +1/-3 dB of 6 dB/octave, 300 to 3000 Hz per EIA	Mod fidelity better than 5%

NOTE:Rated power output is measured at the transmitter power amplifier output connector per FCC Type Acceptance filing information. Any customer-required optional items such as power measuring devices and/or duplexers will introduce loss between the transmitter output connector and the station cabinet output connector. This loss will reduce the available power at the station connector.

Receiver

<u>-</u>	800 MHz Analog	800 MHz P25 Digital
