RE: M/A Com Private Radio Systems
FCC ID: OWDTR-197-A2

I am confused by this Application.

- 1.) What are you asking for? The Form 731 does not specify what you want. Therefore I cannot even begin my review process
- 2.) The Power Output on the new 731 does not match the old grant. What's happening?
- 3.) Does the new SitePro controller require addition of a new emission designator? Please provide necessary bandwidth calculations along with emission designator.
- 4.) Please show how this equipment meets the spectrum efficiency requirements of 90.203(j).
- 5.) It would be helpful to identify each Occupied Bandwidth plot with it's appropriate Emission Designator.
- 6.) 90.210 specifies that all narrowband plots conforming to Mask D (12.5KHz) must utilize a 100Hz RBW. Please submit.

William H. Graff

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
