## Subject: WorkSight PreView Sensor Model WS6220

A new model of PreView radar sensor was created based on the previously FCC approved WorkZone PreView radar sensor (Model WZPV4015) under FCC ID OXZWZPV2009. The following changes were made to the WorkZone sensor to create the new WorkSight PreView sensor, model WS6220:

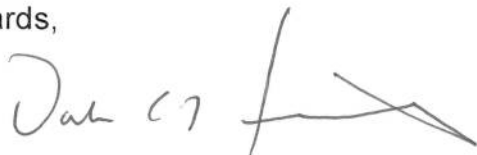

- A new radar dome (radome) was created to provide a different look and feel
- A 10" pigtail harness replaces the connector exiting the rear of the sensor

No changes were made to the internal printed circuit assemblies (Antenna/RF or processor) to create this new WorkSight WS6220 sensor.

This new model is electrically and mechanically identical to the models that were previously approved under FCC ID: OXZWZPV2009.

	
WorkZone Sensor (WZPV4015)	WorkSight Sensor (WS6220)
