Dear Ms. Helen,

Thank you for your cooperation and kindness.
Please refer to attached revised FCC report for your comments.
We appreciate your kind explanation.

Have a nice day!

Best Regards,

S.C. Hong / Project Engineer

>> Question #1: Based on FCC15.215(b), "In most cases, unwanted emissions outside of the frequency bands shown in these alternative provisions must be attenuated to the emission limits shown in Section 15.209. In no case shall the level of the unwanted emissions from an intentional radiator operating under these additional provisions exceed the field strength of the fundamental emission." However, the test report shows the unwanted emission (44.82dBuV/m) exceeds fundamental (38.63dBuV/m). Please explain.
