Dear CCS TW,

The review of this application is complete. Please reply to the following items:

1. Please provide a revised schematic showing the antenna and any circuitry associated with the antenna.
2. The user manual refers to the use of shielded cables for power and I/O connections to the product, but there are no apparent connection points and cables do not appear to have been connected during the tests. Please explain or provide revised user instructions.

Thank you and best regards,

Tim Dwyer  
CCS Technical Reviewer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Dear CCS TW,

The review of this application is complete. Please reply to the following items:

1. Please provide a revised schematic showing the antenna and any circuitry associated with the antenna.  
**Ans: Please see the revised schematic.**

2. The user manual refers to the use of shielded cables for power and I/O connections to the product, but there are no apparent connection points and cables do not appear to have been connected during the tests. Please explain or provide revised user instructions.  
**Ans: Please see page 4 on the revised userman.**

Dear Colleagues,

1. The revised schematic is different from the one originally submitted, but still does not appear to show the antenna and associated RF circuit elements.

2. The revised user manual still includes reference to a shielded power cable on page 4.

Please check again. I think maybe the wrong files were attached to the email

Best regards,

Tim Dwyer

Dear Mike:

Please help to forward to Mr. Tim. Thank you.

The revised user manual still has shield power cord requirements. Please take a look page 4.  
This device has no power cord connector.

Ans: The user manual had been revised on page 4.

The revised schematic diagram still does not show the antenna connecting point and this schematic diagram only contains Power section.

Ans: Provide the schematice for module.

Best Regard

Amanda:

The revised user manual still has shield power cord requirements. Please take a look page 4.  
This device has no power cord connector.

The revised schematic diagram still does not show the antenna connecting point and this schematic diagram only contains Power section.

So you are not answering Tim's questions.

Best Regards
