March 20, 2009

Dear Sandy,

Thank you for your application. In order for us to process your approval, the following must be addressed. Please provide a response in a timely manner to avoid delays or dismissals.

Technical Review:

1. Some of the internal pictures are blurry. Please re-take these pictures.
2. Some of the measurement equipment in the part 22/24 test report seems to be out of calibration. Also, was a base station simulator used for testing? There does not appear to be one in the equipment list.

If you have any questions or concerns, please contact us.

Thank you!

Jennifer Sanchez

Admin Review By: Jennifer Sanchez

Technical Review By: Dusmantha Tennakoon

Please note that partial responses increase processing time and should not be submitted. The items indicated above must be provided before processing can continue on the above referenced application. Failure to provide the requested information in a timely manner may result in application dismissal.

Responses to:

MET Admin request dated 3/19/09 and Technical RT dated 3/20/09

Admin Responses:

1. A revised Class II Permissive Change Letter is attached.
2. Please delete the schematics and parts lists remitted to you for this application. The applicant did not want those documents submitted. They were for our internal use only. Please delete and do not submit these with the C2PC application, thus eliminating the need for a confidentiality letter.
3. The TCB agreement is being remitted with this response.

Technical Responses:

1. Pictures are forth coming and will be remitted tomorrow morning once they are received from the applicant who is not only in England, but is waiting for the custodian of these photos to return to the office.
2. The calibration table in the report has been updated to reflect the most recent calibrations to the equipment used to perform the tests. We did not use a base station simulator for testing purposes.
