Product Description: The transmitter is an livestock transponder reading system based on the Texas Instruments 'TIRIS' tag reader module. The system comprises a control box and an antenna. The control box contains a power regulation circuit and the tag reading module. The antenna is a cubic structure designed to allow an animal to walk through it. The antenna may be made from either galvanised or stainless steel.

Applicable Standard: 47CFR PART 15 - Non-Licensed Transmitter/Intentional Radiator

Compliance Testing: The system was fully tested against applicable FCC regulations and a full test report was compiled.
