User Manual

Attached is a preliminary copy of the Instruction Manual. The following information will be included in the next revision of the manual:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by Sentrol, Inc. could void the user's authority to operate the equipment.

This manual will be provided to the end-user with each unit sold/leased in the United States.

LENTAK has your Solution... The PORTABLE, WIRELESS,

PET CHIME™

PORTABLE WIRELESS
ELECTRONIC
PET DOORBELL

instruction
guide

PP-10

IMPORTANT NOTICE

Should another PET CHIME™ PET PAW™ nearby activate your chime, you can set your own ringing code by disconnecting a wire in both the remote control and the chime. The PET PAW™ has a RED and GREEN wire in the battery case. Likewise, the chime has RED and GREEN wire in selection recess. To set your own ringing code, simply cut either the RED wires on both units or the GREEN wires on both units.

WARNING: If you cut one RED and one GREEN or all FOUR (4) wires, you will disable the whole unit.

- Operates on one 9V battery (not included)

- Pet Chime™
- Wireless chime operates up to 100 ft. from the Pet Paw™
- Wall mountable or stand on shelf.
- Operates on three AA batteries (not included)

TRAINING INSTRUCTIONS:

Training your pet to use the PET CHIME™:

The pet chime is easy to teach your pet to use. First allow your dog to get used to the sound of the chime. Place the PAW next to the door that you will be training your animal to go out. With the PAW on the floor, place your hand on the device showing your pet how the chime works. Next push the PAW to sound the chime and open the front door feeding out a treat so to entice your pet to retrieve it. Once your dog has gone outside fetch him back in. Repeat the procedure several times. Always placing your hand onto the paw so that the chime rings before opening the door.

Once your dog is accustomed to the activity place their paw on the chime standing. Do you want to go out? Do you want to go out? Assist the dog in activating the chime rewarding him when he does. Repeat the activity assisting the dog to ring the chime and then opening the door until the dog is comfortable with stepping on the paw on its own.

The Pet Touch™ technology will allow any size dog to easily activate the chime. The activity must be repeated so that your pet will know that when they want to go out they must use PET CHIME™.

Each pet's behavior varies. It is important to make sure that the activity is repeated and done by every member of the family. The adaptation of your pet using the PET CHIME™ is dependent on your training.

INSTALLATION AND OPERATION INSTRUCTIONS:

PET PAW™:

1. To remove battery compartment cover, pinch rear clasp to release.
2. Insert one 9V battery.
3. Reattach compartment cover.

PET CHIME™:

1. To open the battery compartment cover, press the dots, then push and slide upwards.
2. Insert three AA batteries, following the + and - diagram in the cavity for correct placement.

3. Select a chime:

- D = Regular (Ding-Dong)
- B3 = (Woof-Woof)

4. Reattach compartment cover.
