

Cautions

Any changes or modifications to your phone not expressly approved in this document could void your warranty for this equipment and void your warranty to operate this equipment. Only use approved batteries, antennas and chargers. The use of any unauthorized accessories may be dangerous and will invalidate the phone warranty if said accessories cause damage or a defect to the phone.

Although your phone is quite sturdy, it is a complex piece of hardware and can be broken. Use common-sense guidelines to avoid dropping, hitting, bending or sitting on it.

FCC Notice

The phone may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the telephone if such interference cannot be eliminated.

Specifications Subject to Change

The information contained in this manual is believed to be correct at the time of printing, however, Philips reserves the right to change or modify any of the specifications without notice or obligation to update existing units.

RF Exposure Information

This device has been tested for Specific Absorption Rate (SAR) as specified in the FCC document, “Guidelines for Human Exposure to Radio-frequency (RF) Electromagnetic Fields”. This device was found to be compliant with the FCC SAR limits for the following types of operations:

- Hands-free operation with ear-piece and microphone
- Handheld operation to ear
- Hip-mounted operation

Use of the phone in other configurations may allow exposure limits to be exceeded and is therefore discouraged.

Information to the User

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation; if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient / relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit other than that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void user’s authority to operate the equipment.
