Attestation Letter for data transmission protocol.

We, **Intel Corporation**, attest that the device under FCC ID **PD9BE200NGW** complies with device protocol requirements as per FCC 15.407 (c).

Data transmission is always initiated by software, which is then pass down through the MAC, through the digital and analog baseband, and finally to the RF chip. Several special packets (ACKS, CTS, PSpoll, etc..) are initiated by the MAC. There are the only ways the digital baseband portion will turn on the RF transmitter, which it then turns off at the end of the packet. Therefore, the transmitter will be on only while one of the aforementioned packets are being transmitted

Best Regards,
