

CLARIFICATION TO THE OPERATIONAL DESCRIPTION OF THE ABID DISPENSER

On January 30, 2001, D.L.S. Electronic Systems Inc. tested the ABID DISPENSER for Berg Company to measurement requirements set fourth in FCC “Rules and Regulations”, Part 15, Subpart C, Section 15.225. During testing, all measurements, i.e. band-edge measurements, were taken with the transmitter continuously sending RF pulses through the buffer amplifier to the coiled antenna in the activator ring.
