Re: Question "Please explain how the device meets the requirements of Section 15.231(a)(1)."  
Application pending for PLGMCS001 , EA100726.

This device does not transmit for longer than 1 second, when activated by user. After that point, there are no other transmissions.

**The Transmitter unit deactivates in less than 1 second once activated...**

**1: The room key is inserted by user.... . The transmitter sends an ON code, which lasts about 1 second. It will not transmit any more at this point.**

**2: The room key is removed by user.... the transmitter sends an OFF code, which also lasts about 1 second. It will not transmit any more.**

Sinserly,

Sheldon Smith, Pres
