

Date: March 21, 2011

We, Atheros Communications, Inc., declare the device of FCC ID: PPD-ARS42SB, doesn't have ad hoc function on "non-US frequencies"; in non-associated mode, that software and associated drivers will not initiate any transmission on DFS frequencies and the device does not support radar detection capability. This includes transmissions for beacon ad-hoc peer-to-peer modes. The product operates in 2.4-2.4835GHz band only.

Should you have any questions or comments regarding this matter, please have my best attention.

Sincerely yours,
