RE: Declaration for BodyMedia MF FCC ID:PV8-185

To Whom It May Concern:

BodyMedia declares that the PV8-185 submission utilizes a pre-approved Bluetooth chip. As such, it complies with 15.247(a)(1), (g), and (h) which correspond to the following:

- i. The hopping sequence must be pseudorandom, all channels are used equally on average, the receiver input bandwidth is approximately equal to the transmit bandwidth and the receiver hops in sequence with the transmitter signal
- ii. The system is designed to comply with all the regulations in 15.247 when the transmitter is presented with a continuous data
- iii. The system does not coordinate its channel selection/hopping sequence with other frequency hopping systems for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters.

Please contact me if there is any information you may need.

Sincerely,

Scott K. Boehmke
Director of Hardware Development
