RE: IKUSI  
PVI-TM60

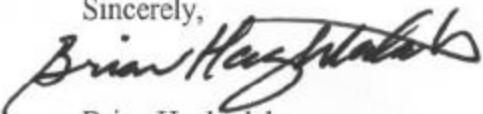

Dear Mr. Graff:

Following is response to your comments regarding the above referenced project.

1. The manual was written for the European version of this product. The USA version operates at 433.64 MHz only.
2. The manual was written for the European version of this product. The USA version operates at a much lower power (less than 1 mW).
3. The transmitter is manually operated by the control buttons. It deactivates the transmission immediately upon release of the control buttons. The device does not transmit periodically under any condition. The device is not used for radio control of safety and fire alarms.
4. The device is not used for radio control of safety and fire alarms, so this section is not applicable.

Please do not hesitate to call me, should there be any questions or concerns.

Sincerely,

Brian Haghtalab  
Operations Manager
