RE: IKUSI  
PVT-TM60

Dear Mr. Graff:

Per our telephony conversation, the IKUSI transmitter was to be granted for range of frequencies (430 to 440 MHz) rather than a single frequency. The data supporting this request has been uploaded to ATCB web site under the above referenced FCC ID number.

National Certification Laboratory requests this modification on behalf of the IKUSI. Your expeditious response to this request is greatly appreciated.

Please do not hesitate to call me, should there be any questions or concerns.

Sincerely,

Brian Haghtalab  
Operations Manager
