

Setup Photographs

<Conducted Emission>

Remote View

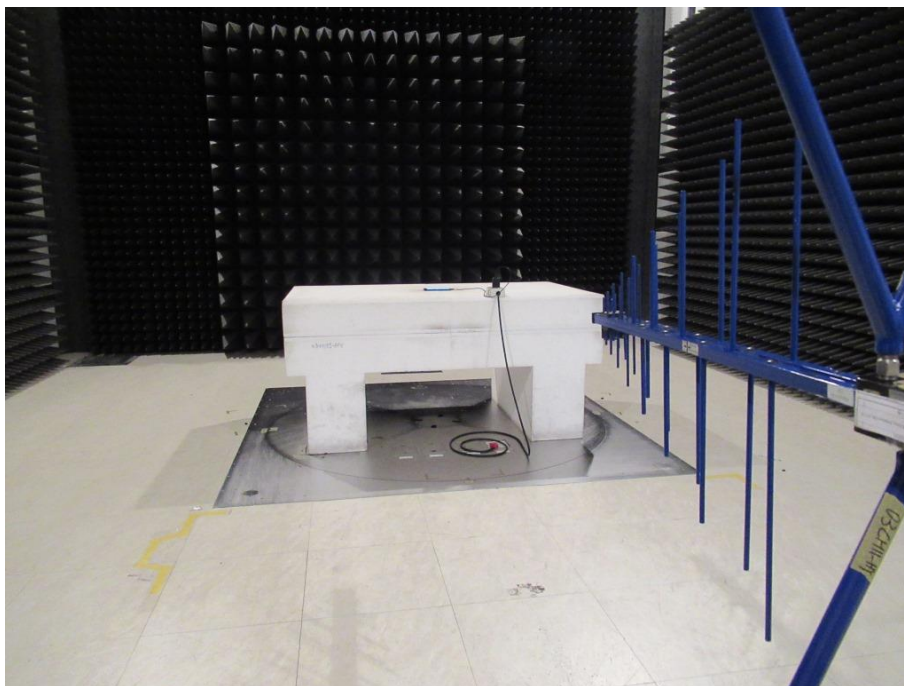

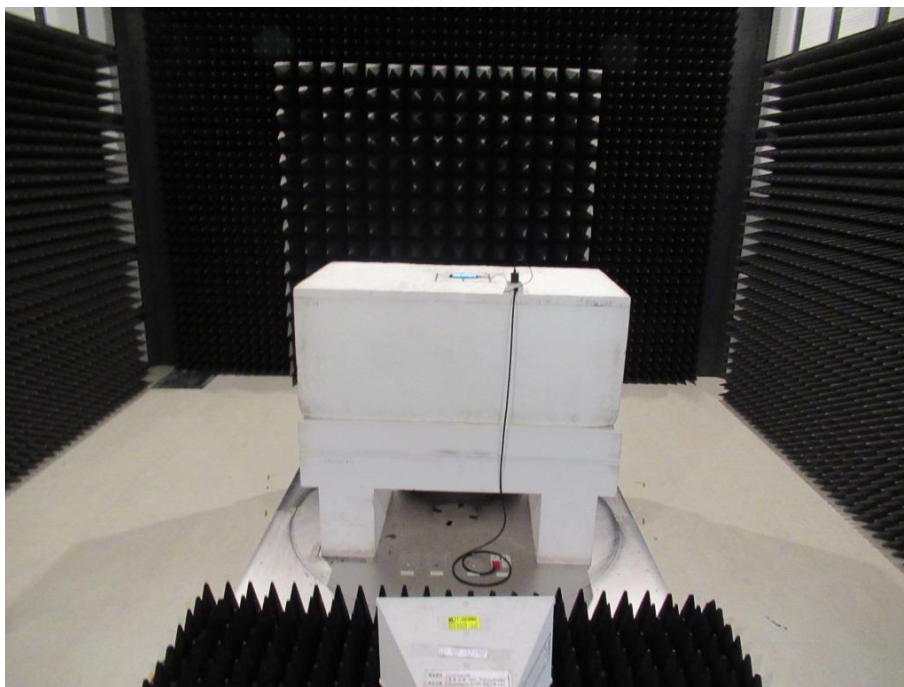

A photograph showing the interior of a laboratory chamber. The chamber has a thick, translucent, slightly textured front panel. Inside, on a flat metal floor, are several electronic components: two small grey modules with yellow labels, a larger silver module with blue and yellow labels, and a black module. A black cable runs across the floor. In the background, a white control panel with a red digital display is visible. The chamber is supported by a dark metal frame.
