Approved by

Stage of Production for TM717

Mr. Stephen Liu
SAR/EMC/Acoustics Engineer
PCTEST Laboratories

Dear Mr. Liu,

This is to inform you that the pre-production AP2.2 hardware you received for FCC testing and filing is consistent with planned production samples. Specifically this relates to:

Model number:	Sony Ericsson TM717
Type number:	AAD-3880030-BV
FCC id:	PY7A3880030
IC id:	4170B-A3880030

GSM 850 Power Class 4, GSM 900 Power Class 4, GSM 1800 Power Class 1, and GSM 1900 Power Class 1 mobile station. There is no hardware difference between the samples you received and the production units, other than a label indicating the production units are not prototypes. The RF calibration procedure used for your samples and production units is also the same.

Best regards,
Rodney Dixon
