FCC/SAR Hotspot Power Back Off implementation in PY7A3880123 and PY7A3880124

26th/Aug/2011
RF Team, Sony Ericsson Mobile Communications Beijing

This document is regarding the power back off implementation in PY7A3880123 and PY7A3880124 during Wifi Hotspot mode for SAR measurement.

When Hotspot mode is activated, an automatic RF power reduction is activated and reduces the maximum output RF power level, please refer to below table for detailed info. When Wifi Hotspot mode is deactivated, the RF output power levels return to their normal RF power level.
