

Re: FCC ID PY7FD022011
Applicant: Sony Ericsson Mobile Communications AB
Correspondence Reference Number: 31069

1) If not in filing already, please state GPRS mobile station class (A, B, C) - if class A please submit multislot-operation SAR data for head positions.

Answer: The device has GPRS class B implemented. The revised SAR report reflects this information

2) SAR report says procedures from draft IEC 62209-2 were used; as we understand that draft includes various multi-mode SAR methods. If not in filing already, please explain which of these methods were applied here and how.

Answer: please refer to the revised SAR report see page 8 (15) § 8.6.
"Alternative 1" was used

3) SAR report does not seem to include all info specified by OET 65 Supplement C Appendix B. II., including by maybe not limited to: measurement uncertainty details, system verification plot(s). Please revise filing to bring into accordance with Suppl. C.

Answer: A revised SAR report has been uploaded.
