RE: Cisco-Linksys, LLC.

FCC ID: Q87-WMP55AGV12

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The RF exposure exhibit mentions that both the 2.4 and 5 GHz can transmit simultaneously. If this is the case, then simultaneous TX EMC data is necessary to be provided. However, from the block diagram, it appears that the device may not TX simultaneously. Please confirm. If it does, please provide simultaneous TX data. If not, please adjust the RF exposure exhibit to remove reference to this.
- 2) Please add average data for point 11520 MHz on page 100 for the Vertical Polarity. The peak data shown exceeds the average limit of 54 dBuV/m.

A handwritten signature in black ink, appearing to read "Timothy R. Johnson".

Timothy R. Johnson  
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
