!NOTE: Accessories are subject to change without a prior notice for further improvements in of this product.

PC System Requirements

Basic requirements should be satisfied to use this player on your PC.
Make sure to check the following recommendations before its use:

- Pentium 200MHZ or above

- Windows 98SE / ME / 2000 / XP
  (Windows 98SE - Install Driver)

- Mac OS 9.0 / 10.0

- USB Port (2.0 supported)
  (Requires PC with a capacity of more than
  Pentium III 1GHZ. Couldn't be supported
  depending on a mainboard. Isn't supported
  without Service Pack 1 under Windows XP.)

- CD-ROM Drive

- Hard Disc Space 20MB or above
  (an additional capacity may be required to save the music files.)

- 64MB RAM or above
!NOTE: Memory spaces available may be less than those indicated above since the firmware uses some portions of the memory available to your PC for the operation by its system.

Safety Precautions

Listening Cautions…
The output of the product guarantees the best sounds at its proper volume. As listening with a volume set at a high position for a long time may damage your sense of hearing, make sure to listen to the music at a proper volume.

Avoid Strong Impact or Vibration
Be careful in handling the product and its accessories since their falling on the floor or giving an impact on them may result in their serious damages.

Storage
Avoid the places exposed to heat, humidity or magnetic field

Cleaning
Wiping the player with chemicals may result in discolorations or damages on its surface.
Wipe out the player with a soft cloth.

Using the Battery…
If you do not use the Player for a long time, do not insert a battery in the Player.

!NOTE: Never try to dissemble, repair or remodel it.

Features

Multi-Codec Player
Multi-codec player supporting MP3, WMA, ASF(audio), OGG, WAV format.

FM Transmitter Function(My FM Station)
If you select the embedded FM Transmitter mode, you can enjoy a high sensitivity of music wireless through device with FM radio(ex. Car audio, home audio, ordinary FM radio).

High Quality 3D Sound, MEX (Magic EXpander)
Experience a profound sound due to an introduction of MEX which allows you to feel 3D expansion effects with richness while keeping the original and stable sound of the player. 3D Sound MEX is a new 3D effect that does not make you feel tired even if you listen to it for a long time.

EL Display
With its introduction of Blue/Yellow 2 Color EL Screen Graphic Display, the player can command more luxurious and fancy images.

Firmware Upgrade
Upgrade Firmware to add/change/improve functions and performance of the Player. Always enjoy the music with its latest version of performance.

Voice Recording
A function of high quality voice recording allows a clear recording for conferences and lectures.

Features

FM Radio

Conveniently enjoy the FM radio with a variety of functions such as the manual/automatic frequency search, automatic tune to the radio station, and the station preset.

Easy Navigation

Tree structure allows you to manage and search a specific song more conveniently.

Lyric Display(LDB)

You can easily edit, save and display the lyrics of a song in 3 lines on the large display.

6 Preset Equalizer

You can produce your own sound quality with the 5-band User EQ and 5 recommend EQs including Normal, Classic, Pop, Rock and Jazz.

Removable Disk Device

You can freely upload and download files without a separate manager program since the player is recognized as a removable disk when it is connected to the PC.

Direct Encoding

You can record an external sound you hear through LINE-IN port of the player, as from FM radio broadcasting.

Installing USB Driver

Make sure to install the USB driver before connecting it to the PC.
When there appears "Add New Hardware Wizard", press the "Cancel" button and install Upgrade Manager.
If you install Upgrade Manager, the USB driver will be automatically installed.

► The driver is recognized without installation of a separate program under Windows ME, 2000, XP, but make sure to install it if Firmware Upgrade is required.

► If Upgrade Manager is not installed under Windows 98 SE, the player cannot be recognized as a removable disk. Make sure to install Upgrade Manager.

1 Insert Installation CD into CD-ROM Drive and then click setup.exe in the folder of Upgrade Manager.

.
2 The installation will start.
Installing USB Driver

3 Click "Next".

4 Click 'Next' or 'Yes" in subsequent windows.

When the installation has been done, connect it to the PC as shown in the next page.

To download music files (MP3/WMA/ASF/OGG) from the PC, use USB cable to connect the MP3 Player to the USB port of the PC.
**(Make sure to use only USB cable supplied with the MP3 Player.)**

※ Connect "B" in the direction allowing the arrow mark is shown on the bottom.

A type

B type

A type   B type

Connect 'A' of the cable to the USB port on the part of the PC.
Open the cover of the USB port on the part of the player and connect 'B'(a smaller part) of the cable to the USB port.

Install the USB driver in the following way when it is not recognized as a removable disk.

If there doesn't appear "**EZMAX EZMP-4200 USB Device**" in "Disk Drive" of Device Manager or "**USB Mass Storage Device**"(Except Window 98SE) in Universal Serial Bus Controller, or if there does a yellow exclamation mark or "Unknown Device", the driver has not been properly installed. In this case, manually install the driver.

If an error has occurred while installing USB driver

1 Check Device Manager.
- Windows 98SE/ME
  Control Panel→System→Device Manager
- Windows 2000 (Professional)
  Control Panel→System→Hardware
  →Device Manager
- Windows XP (Professional)
  Control Panel→Performance and
  Maintenance→System
  →Hardware→Device Manager

2 Check whether there are any device with a exclamation mark or question mark(unknown device or USB device) in Device Manager.

3 Double click the device with a exclamation or question mark.
4 Press "Install Driver Again"..

5 Click 'Next' in the subsequent windows. When searching driver files as shown below, click the "Browse" to select C:\Winnt\Inf or C:\Windows\Inf and press "OK".
6 Press "Next": in the subsequent windows to complete the installation of the USB driver.

For Windows 98SE

Click 'Next' in the subsequent windows.
Designate the path for searching the driver file to **\Upgrade Manager\Drivers of CD Drive**.
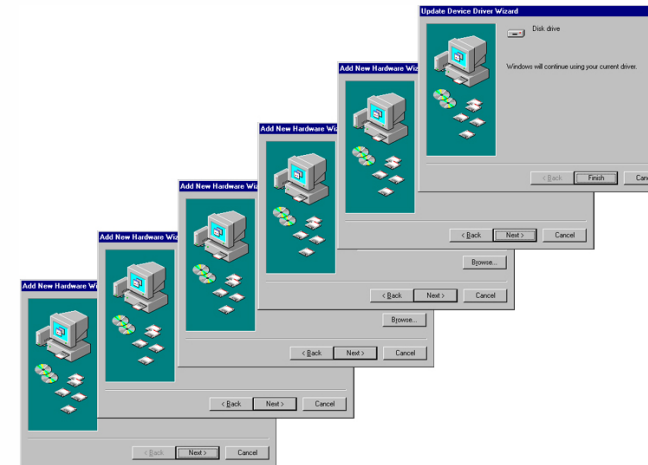

Make sure to restart your system after installation is completed.

Since the player is detected as a removable disk on the part of PC, you can easily upload, download, or delete music files or folders in Windows Explorer without a separate manager program.

1 Copying files to Player(Download)
1) When you connect the player to the USB cable, it is recognized as a removable disk in Windows Explorer.
2) Click the removable disk to enter into a memory area of the player.
3) Run one more Windows explorer.
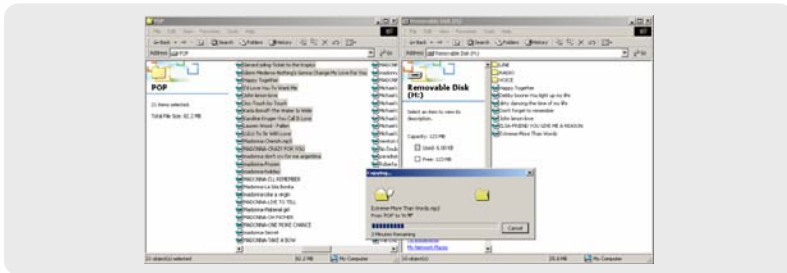

4) Select the file to save,
 ① Drag and drop it to the removable disk.
 ② Or, right-click to select Copy. Designate the removable disk and right-click to select Paste.
5) Then, there will appear a file transfers window, indicating that the file is being copied to the removable disk.

2 Export File(Upload)
1) Connecting the USB cable to the Player allows the Player to be recognized as a removable disk in the Windows Explorer.
2) Select the removable disk to have access to the memory area of the Player.
3) Run one more Windows Explorer.
4) Select a file you want to export from the removable disk, and then:
 ① Drag & drop to the disk to which you want to export.
 ② Or right-click the mouse to select Copy, and select a folder to which you want to export, and then right-click the mouse to select Paste.

3 You can add or delete a folder in the Windows Explorer.

When you download a music file to the player, wait until there appears **Ready** on the display as shown below. If you disconnect the USB cable during DOWNLOAD or UPLOAD, the file may not be properly downloaded. Check the display(READY) and then disconnect the cable.

READY Status   **DOWNLOAD**   **UPLOAD**

4 Format Player

1) Formatting in the Windows

① Select the removable disk, and then right-click the mouse to select Format(Select "FAT" as a file system).

② Click Start. (If you remove the USB cable while formatting, the player could be damaged. Be sure to remove it after the formatting has been done.)

2) Formatting in the Player

① Press the MENU button to enter into the menu mode.

② Select the File Manager with ◄◄ ►►I button and then press the MEMU button to enter into File Manage menu.

③ Select Format menu with VOL +/- button and then press the MENU button.

④ After selecting "Confirm", press the MENU button one more to start formatting.

Properties   Stop

☐ Display device components
☑ Show Unplug/Eject icon on the taskbar   Close
Disconnecting USB Cable

3 Click "OK" to confirm the device to stop.

4 Click "OK" to remove USB cable.

> ※ **Abnormally disconnecting the USB cable may result in damages or a failure to the player.**
> **The order of music files that appears when you select a removable disk in Windows Explorer has nothing to do with the actual sequence in accordance with the playback.**

Upgrading Firmware

1 Download the latest version of firmware at our website (www.ezmax.co.kr) and unzip it (unzipped to 4 files.)

2 Copy the unzipped latest firmware files into C:\Program Files\EZMAX\EZMP-4200 folder.

3 Connect the USB port in the status of Power-off so that the PC can recognize the player.

4 Execute Firmware Upgrade manager program.
5 Wait for the device to search. Connect USB cable.

Upgrading Firmware

6 Click "Start" to proceed Firmware Upgrade. Select "Data Area Formatting" to delete all the files in the system.
Disconnecting the USB cable during Firmware Upgrade may result in malfunctions of the player or the PC.
7 When the firmware upgrade has been completed, click "Close" and remove the USB cable(Refer to Disconnecting USB Cable).

Installing LDB Manager

1 Insert the Installation CD into CD-ROM Drive and click setup.exe in the folder of LDB Manager.

2 Select a language to use.

3 Click "Next" or "Yes" in the subsequent windows.
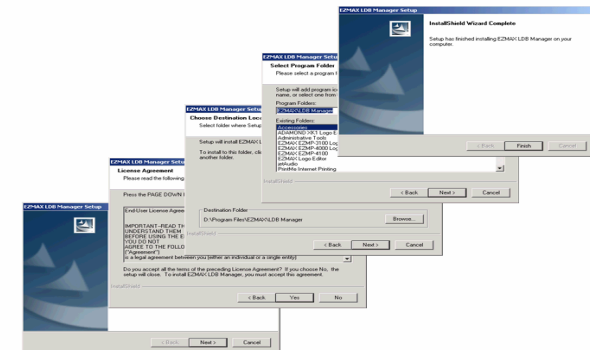

LDB Manager is a program that automatically enters the lyrics in MP3 music files and can be used without connecting the player to PC.
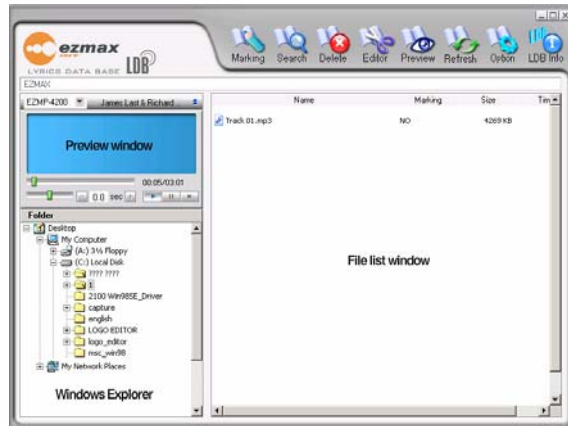

· **The Internet should be available so that it can get information about a lyric from the lyric server.**
· **Lyrics are not marked for the VBR file since time information does not match.**

1 **Enter Lyrics(Auto Search)**
① Select the MP 3 file to enter the lyrics in the file list window, and press "Enter Lyrics" on the top menu.
② The lyric server searches for information about the lyrics according to information about the relevant files to automatically enter the lyrics.
③ After the lyrics have been entered in, you can check the lyric marking information is displayed in the file list window.
④ Play back in the preview window to check information about the lyrics.

2 Enter Lyrics (Manual Search)

① Select the file to enter the lyrics and click the [icon] button on the top menu.
② Enter the name of singer or title of song to search for in Enter & Search Lyric window and press the Search button.
③ The songs matching the time information, singer information and title will be displayed.
   Click the MP3 file to check the lyrics to enter in the right window.
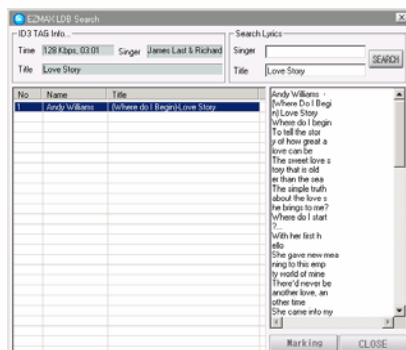

④ Press the Lyrics Marking button on the right bottom of the LDB search window to complete entering the lyrics.

3 Delete Lyrics

Select the MP3 file to delete lyrics and press the [icon] button to delete their information.

4 Manually Enter Lyrics

① Select the file to enter the lyrics and press the [icon] button on the top menu.
② Press Text Editor, enter the lyrics you want and then click OK.
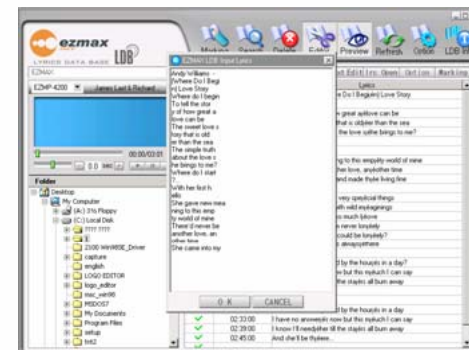

③ Press Playback in the preview window and press the SYNC setting button at the point where there should appear one line of lyrics editing window.

④ When SYNC setting has been completed, press the Lyrics Marking window.

5 Modify Lyrics

① Select the MP3 file to modify lyrics and then press the button.

② Double click the area to modify lyrics so that you can modify the lyrics or time.

Sound Setting

◎ A user can adjust up to 8 levels for each frequency depending on its 5 areas.

EQ USER SETTING

Use ⏮ ⏭ button to move horizontally and − VOL, VOL+ button to move vertically.

◎ MEX is a term referring to 3 dimension stereo sound effect developed at EMERSIS, consisting of detailed functions such as LITE, BASS and PRO.

  ► **LITE** : gives a light and wide stereo image.
  ► **BASS** : gives a profound sound with reinforcement of low sound range.
  ► **PRO** : gives a rich and stable low sound range of feeling with stable and wide stereo images.

  ▪ Select a proper volume since the sound will be louder at MEX.
  ▪ It can be supported only if sampling frequency refers to 32Khz, 44.1Khz, 48Khz.
  ▪ The function of MAX is not set for the voice-recording WAV file.

15, 30, 45, 60 seconds are available. When the time is set and if you press the ►►|
button during play, it will be played back from the time adding the time set in the
current playback time. When you press the ◄◄| button, it will be moved to the
time as much as the time set in the current play back.

- **If you set it to 0 second, STUDY function is not supported.**

◎ How to Insert Battery
!NOTE: Make sure the polarity (+ and -) of the battery is correctly inserted.

◎ Battery Gauge

| Full Gauge | Mid Gauge | Low Gauge | Zero Gauge |

HOLD Setting Method

◎ If you use the function of hold, you can prevent a mal-function by a button while the player is played during player operation, including an unnecessary consumption of built-in battery.

To Set to HOLD Status

Push the HOLD switch on the side of the player at the direction of the arrow (HOLD).
The player is locked off with 🔒 displayed shown after the display shows "HOLD".

To Release Hold Status

Move the HOLD switch to the direction opposite to the arrow.
The hold status is released as there disappears 🔒 on the DISPLAY.

Troubleshooting

◎ If you think the player fails, check the followings:

Power may be not turned on.

• Check if the battery is properly inserted with correct polarity.
• Battery may be dead. Replace the battery.
• Check whether the HOLD switch of the player is set at ON.
  (Set it to the direction opposite to the arrow(OFF) if it is set at ON.)

Unrecognizable characters may be shown in the display.

• Check if the language is properly set in the LANGUAGE menu.
• Since the ID3 Tag of a song may be incorrect, you should fix it using such an audio player program as Winamp.

Radio station makes such a noise as "boooo~" or "Ssaaaa~", or its reception is bad.

• Change the direction of the Player and its earphone.
  Please turn the power of the electric appliances OFF near the Player.
  If the noise is reduced, use the Player away from them.
• As an earphone plays a role as an antenna to the player when listening to the radio station, no earphone may cause a poor reception.

Troubleshooting

No sound or noise is heard during the playback.

- Check if the music file is stored in the memory.
- Check if an earphone is properly plugged in.
  Or check if its jack is contaminated by foreign substances.
- Check if the volume is set to "0".
- Damaged data makes noise or breaks off the sound from the MP3 and WMA files. Replace it with other file to check if the data has been damaged.

Cannot download files.

- Check if the USB cable is properly connected between the Player and PC.
- Check if the USB driver is properly installed.
- Check if the memory is sufficient.

Buttons has been locked down.

- Check if the player is set at HOLD.

> **!NOTE: if the player stops due to an unexpected problem or the "End" button does not operate at all, press "MENU" and "REC" at the same time to turn off the player. Then, set the clock again.**

FCC Compliance Statements

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.   These limits are designed to provide reasonable protection against harmful interference in a residential installation.   This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.   If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

Warning : Your are cautioned that any change or modifications to the equipment not expressly approved by the party responsible for compliance could void your authority to operate such equipment.
