**Changes from hardware version x7 to x8
Twig DISCOVERY; TGP80EG, FCC ID: QFPTGP80EG**

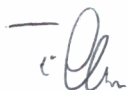

Dear Sirs,

Benefon has performed FCC Part 24 testing on the GSM mobile phone Twig DISCOVERY; TGP80EG, FCC ID: QFPTGP80EG, at 7 layers AG.

The initial full test was performed on the hardware version x7. The related test report is 4_BENEF_0105_GSM_FCCa, dated 2006-06-19.

After Benefon upgraded the hardware to version x8, we have reviewed the related documentation and came to the conclusion that only RF Output Power and Field strength of spurious radiation shall be repeated. The results can be found in test report 4_BENEF_0105_GSM_FCCb, dated 2006-06-19.

Regards

A handwritten signature in black ink, appearing to be 'T. Lohoff'.
