3 Cable Connections

HUAWEI Touch is a tablet used to operate Huawei's next-generation endpoints. The Touch can be:

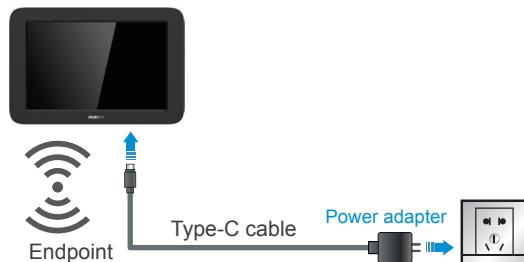

- Connected to the Touch port on an endpoint and powered through the Touch port.

- Connected to a switch through a network cable and powered using the included power adapter.

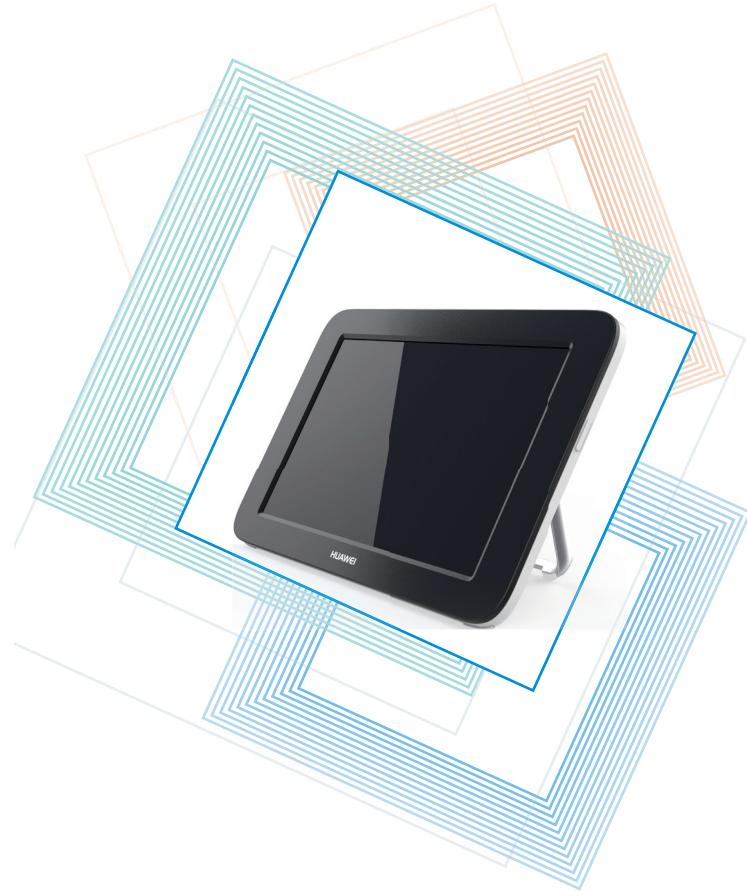

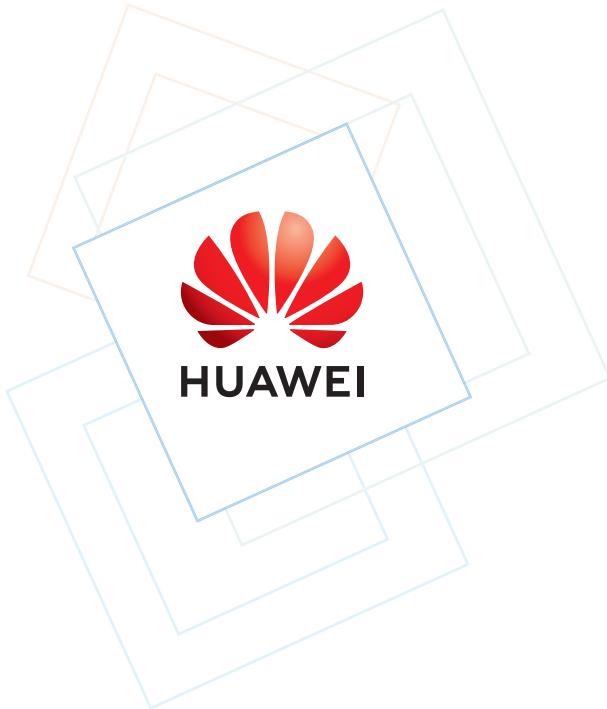

- Connected to an endpoint over Wi-Fi and powered using the included power adapter.

For the settings required for connecting the Touch to an endpoint, see the configuration guide of the corresponding endpoint model.

HUAWEI Touch

Quick Start Guide

OPEN SOURCE SOFTWARE NOTICE

On the touch panel, choose **More > Settings > Open Source Licenses** and view details under **Open Source Software Notice**.
