

Answer to FCC Question

Applicant: Huawei Technologies Co., Ltd

Correspondence Number: 24623

731 Confirmation Number: TC394305

Product Model Number: BTS3606 & BTS3606A

1) Please update the grant comment to clarify that composite power stated is per port.

Answer:

Our TCB will deal with it.

2) Please justify that test results represents all modes of CDMA2000 operation.

Answer:

Huawei's CDMA Base Station BTS3606 & BTS3606A support forward channel RC1~RC5 and reward channel RC1~RC4. The supported radio configurations are listed in following figure1.

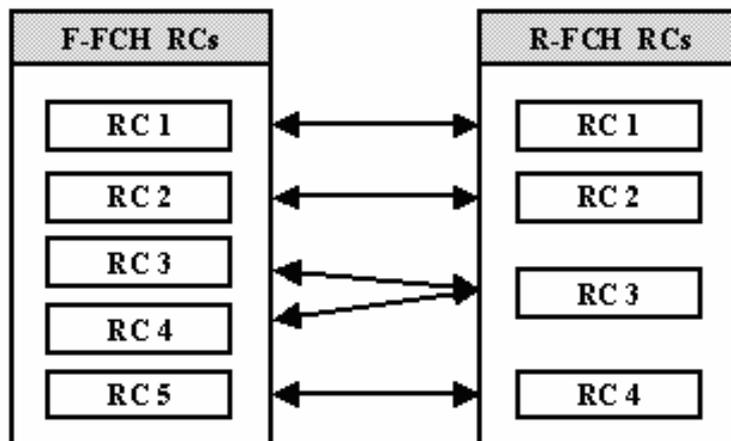

Figure 1 Radio Configuration list

3) Please provide spectral plots for all modes of CDMA2000 operation.

Answer:

The appendix gives the output power in different RCs. We can find the output

power difference in RCs is very small.

And we select two typical mode to do the band edge conformance test. The two test mode are RC1(Forward)-RC1(Reward) and RC3(Forward)-RC3 (Reward). For the detail test result, please refer to the appendix.
