

RF Exposure Info

FCC ID: QISM3710

According to KDB447498 section 4) c) iii) 1) hand SAR is not required if output power is $< 1000[f(\text{GHz})]^{-0.5}$ mW (source-based time-averaged)

According to KDB447498 section 4) c) iii) 3) body SAR is not required if output power is $< 300[f(\text{GHz})]^{-0.5}$ mW (source-based time-averaged)

Frequency	Threshold for Hand SAR	Threshold for Body SAR
850 MHz	1085 mW	325 mW
1900 MHz	725 mW	218 mW

Output power of the device:

Frequency	Mode	Source-based time-averaged output power
850 MHz	GSM	232 mW
1900 MHz	GSM	108 mW
1900 MHz	WCDMA	147 mW

Conclusion

Since the output power is below the thresholds of KDB447498 no Body and Hand SAR is required
