5" MID with 3D Video Player Function without Glasses

Ice Cream Sandwich Version

3DNURI Co., Ltd.

WWW.3DNURI.COM

The screen and the picture in the User's manual may differ from the actual.

Hello: Thank you for choosing the company produces the **Mobile Internet Device** (below **MID**) which is able to 3D Display, you can fully understand the use of the MID by reading this manual,.

Cautions and Warnings

Note : "Note" help you make better use of the MID.

Be careful : "Be careful" if instructions are not followed, there may be damage to hardware or loss of data.

Warning : "Warning" indicates a potential for property damage, personal injury, or death.

Remark : Google, Android, Android Market, Gmail, Google Calendar, Google Maps, Google Latitude, YouTube is trademarks or registered trademarks of Google Inc.

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
