

With successfully overcoming the shorts of power supply system to the bicycle, R'ND has designed "the 1<sup>st</sup> Brake Light", RND128, to increase the safty of riding. RND128 has not only night light but also the same brake light function as automobiles. It warns the following automobiles to keep their safty distance, especially during the hazardous weather such as heavy rain and foggy days.

Product Specifications :

1. Frequency : 433.92MHz (UHF Band)
2. Battery : DC 3V (CR2032)
3. Battery Life :
  - \*Battery is 12 months (based on 10 mins per day)
  - \*Running : 80hrs
