RE: Class III Permissive Change Request

FCC ID: QWP-50450M

To Whom It May Concern:

Please be advised that pursuant to FCC Rule 47CFR 2.1043 the manufacturer requests that the above referenced model be approved for class III permissive change.

The reason for the class III change is an update in software to support operation in the Part 90Y 4.94 to 4.99 GHz Frequency Band. Software support of this frequency band can only be enabled by software controlled by Cambium Networks.

Cambium Networks confirm that the PMP 450m FCC ID QWP-50450M used in this C3PC submission is electrically and mechanically identical to the PMP 450m used in other grant submissions.

Cambium Networks confirm that there has been no change to the original Software, Distribution and Security Documentation to support this class III permissive change request.

Thank you for your attention to this matter.

Yours faithfully

Donald W Reid
