Subject: FCC ID: QY4AVT9003A

Mr. Ramirez:

In order for processing of this certification application (FCC ID: QY4AVT9003A) to continue, the following issue(s) will have to be addressed:

- 1) The application form indicates a frequency range of 902-928 MHz; however, the test report indicates that the device operates from 907-923 MHz. Please correct the application form.
- 2) Please indicate the procedure used for making average measurements.
- 3) The device has two sets of input ports; composite video/audio ports, and a DC/Video/Audio port. The test report seems to indicate that only the composite input mode was tested. Were both modes tested?
- 4) Please indicate the connector-type for the antenna.

The item(s) indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Please upload responses and/or exhibits to the electronic filing website. Your correspondence number is QY4AVT9003A-1.

Best regards,

Scott McCutchan
