

Front View of the EUT

A black Control4 AV receiver is shown from a front-facing perspective. The front panel is densely packed with various ports and controls. On the left, there are two D-sub ports, a green terminal block, and a network port. The center section features three large multi-pin connectors, a set of four optical ports, and a set of four analog ports. To the right, there are four more multi-pin connectors, a set of four optical ports, and a set of four analog ports. The bottom right corner contains a control panel with a small display, a red emergency stop button, and a grid of buttons. The Control4 logo is visible on the right side of the front panel.
