TIMCO Engineering Inc.  
849 NW State Road 45  
Newberry, Florida 32669

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a Class II Permissive Change approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a Class II Permissive Change approval of the Wireless Device Server (MN: WiBox, FCC ID: R68WIPORTG), which is a Wireless Device Server that provides a network-enabling solution based on the IEEE 802.11g wireless standard. WiBox allows Original Equipment Manufacturers (OEMs) to add wireless connectivity to their products by incorporating it onto a circuit board.

It was tested as a standalone device with a Wanshih (PN: WSS003) antenna continuously transmitting and receiving form the antenna port.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas".
