Columbia, MD 21046

To whom it may concern:

FCC IDs RAD466 and RAD467 are tablet PCs that share the same enclosure, main logic board, display, battery and I/O design. Both FCC IDs use the same Wi-Fi / Bluetooth chipset, and operate using the same transmit power levels.

The Wi-Fi and Bluetooth test reports from FCC ID: [FCC ID: RAD466] (WWAN+WiFi) will represent the EMC (FCC Part 15C) performance of [FCC ID: RAD467] (WLAN/BT only). For Part 15B and SAR testing items are full tested.

FCC ID: RAD467 is identical to FCC ID: RAD466, except that FCC ID: RAD467 does not have WWAN radio capability.

FCC ID	RF function
RAD467	WLAN/BT
RAD466	WLAN/BT + WWAN

Pursuant to KDB 996369, we would use Wi-Fi and Bluetooth test reports from [FCC ID: RAD467] (WLAN/BT only) in our application for [FCC ID: RAD466] (WLAN/BT + WWAN) and only worst case of Spurious Emission were verified for this application.

Should you have any comments or questions, please feel free to contact me.

Sincerely,
