Subject: Requesting Class II permissive change for FCC ID: RAS-MT7921
To Whom It May Concern:

The purpose of this letter is to request a Class II Permissive change for FCC ID: RAS-MT7921, original granted on 09/25/2020.

The major change field under this application is:

1. The subject approved module is being used in a specific host(portable category configuration: **notebook computer: Brand Name:Lenovo, Model Name: TP00117C, TP00117E**
2. SAR testing was performed to demonstrate RF compliance.
3. The difference compared with the original module design is antenna change. Two groups antennas are used for the subject approved module in the Notebook Computer as below listed.
4. The host antenna has the same type as originally approved with lower gains in the intentional transmit frequency bands, RF output power has been reduced from the original filing and therefore radiated performance in the intentional frequency bands is expected to be lower than that measured in the original modular approval.
5. Software security remains unchanged from the original application.

Please contact me if you have any questions or need further information regarding this application.

Best Regards
