FCC ID: RD60PW1C0010

This submission is for a Class 3 Change to Software Defined Radio FCC ID RD60PW1C0010. We are adding CDMA 1xRTT modulation to a system previously approved only for GSM modulation. Included are exhibits and test results as per our previous interactions with the FCC laboratories.

Adding this modulation qualifies for a Class III Permissive Change for the following reasons. The hardware that was used in the original certification is the same hardware used to generate CDMA. Additionally, the composite output power for the device while it is transmitting the new modulation is the same as when the device was originally certified.

Please contact me if you need any additional information.

Sincerely,

A handwritten signature in blue ink that reads "Byron Kubert".
