RE: Class II Permissive Change Request to FCC ID: RD9CM840

We request a Class II Permissive Change on the equipment bearing FCC ID: RD9CM840. Following are the changes to the equipment that necessitate this Class Change.

- (1) The equipment is electrically identical to the originally granted device. The electrical circuit has not been modified.
- (2) The purpose of this Class II Permissive Change is to demonstrate that the device complies with rf exposure regulations when integrated into a specific tablet computing device (designated with tradename CrewMate 840 and model N01A100002) with PIFA antenna. To this end a SAR (Specific Absorption Rate) evaluation was performed on the final configuration.

Sincerely,

A handwritten signature in black ink that reads "David Ball".

12/21/2012

David Ball
Sr. Test Engineer
