

FCC ID: RG3WGPS900M01

No SAR Evaluation Required if power is below the following threshold:

| Tunable Range |             |                              |                        |
|---------------|-------------|------------------------------|------------------------|
| F(GHz) Low    | F(GHz) High | Center of Tunable Band (GHz) | 60/f SAR Limitation mW |
| 902.1         | 925.62      | 913.14                       | 65.71                  |

Maximum measured transmitter power:

| Pout<br>Conducted<br>(mW) | Maximum<br>Antenna<br>Gain dBi | Pout<br>EIRP<br>(mW) |
|---------------------------|--------------------------------|----------------------|
| 0.1122                    | 0.12                           | 0.4168               |

Threshold for no SAR evaluation is 65.71 mW

Maximum TX Power is 0.1122 mW Conducted and 0.4168 mW EIRP

Conclusion: No SAR evaluation required since maximum Transmitter Pout (both conducted and EIRP) is below FCC threshold
