Correspondence Reference No.: 26507
Request for Tech. Info.: 03/11/04

Dear Diane:

Transmitted herewith, on behalf of **AST, Incorporated** is an amendment provided in response to the request for technical information dated March 11, 2004.

1. We have uploaded a revised confidentiality letter.
2. We confirm that the touch position screen to phantom is the worst case SAR data.
3. We filed this application to the commission (we did not use the TCB process) because there was no commercially available phantom to meet the Supplement C requirements for this device. The EUT has a low output power value and a low SAR value. The cost of meeting the phantom size requirement is cost prohibitive for the manufacturer. The entire unit was scanned and the worst case SAR data was reported.

We trust this information is sufficient to resolve FCC questions in this application. If you have any further questions, please do not hesitate to contact us.

Randy Ortanez
President
