

TIMEFLYS®

# Mustang RX BABY MONITOR

## Night mode \*

Long press the night light button  on Parent Unit or Baby Unit for 5 seconds, Parent Unit power light turns orange, Baby monitor zero emission when quiet

## Day mode

Long press the night light button  on Parent Unit or Baby Unit for 5 seconds, Parent Unit power light turns green, out of range function works

\* Night Mode will reduce the radio emission to minimum up to zero when it is quiet. However, under Night Mode there is no Range Alarm function. So this mode is recommended to use when Parent Unit and Baby Unit are placed fixed positions such as parents and baby's rooms, typically in the night case. The way to use Night and Day modes is a pending patent of MC Devices.

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction. The distance between the parent unit and the human body is less than 20cm

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna. The distance between the baby unit and the baby should be more than 20cm.
