To FCC

**Overall Assessment Letter for Ezze VI-3
FCC id: RV2VI3**

I have reviewed this composite application and find it compliant. This is an application for a mobile phone supporting GSM/GPRS/EDGE 850/1900 and Bluetooth. Since the mobile phone also has a USB port for connection to Computers a filing for a Class B peripheral has also been made. The phone additionally supports GSM 1800, however are not relevant as they are not supported in North America.

The Bluetooth conducted output power is less than 24mW and the max sum 1g SAR for GSM and BT was less than 1.6W/kg. Therefore, simultaneous transmission SAR assessment was deemed as not being required. I underwent the FCC RF exposure training at the BABT in 2008.

Yours sincerely

A handwritten signature in blue ink that reads 'Allen Ferry'.
