RE: MetroTel Corporation of Minnesota

FCC ID: RWBMT9104RTM

IC: 115A-MT9104RTM

ATCB022237

After a review of the submitted information, I have a few comments regarding the above referenced Application. Depending on your responses, please note that there may be additional comments.

From the internal photos showing the embedded LTE module, it appears that neither the FCC ID nor the IC ID are shown on the module itself, as required, thus confirming that it has actually been certified. Please clarify.

RESPONSE: The modules were sent as engineering prototypes but were specified by the module manufacturer as being the same as the module that was being certified.

The revised Label exhibit shows the FCC/IC label that will go on the module. See Label rev2
