RE: Part 15 Subpart E U-NII 6GHz Attestation Letter

To whom it may concern: We, SparkLAN Communications, Inc., attest that this device under FCC ID: *RYK-WNFS267AXIBT* complies with the device protocol requirements and operational restrictions noted in Part 15E of the FCC's rules for 6GHz bands for Indoor Access Client 6XD.

1. Device Protocol Attestation Statement:

Statement for modules only: Contention-Based Protocol, as demonstrated in the test report, is permanently embedded in the module and is not host-dependent

- a. The device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
- b. this device will always initiate transmission under the control of a low-power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
- c. transmissions will be lower or equal to the power advertised by the indoor low power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.

2. Understanding of Statement acknowledging device restrictions:

- a. Prohibited for control of or communications with unmanned aircraft systems, including drones.
