

## 1. ID label design

The Main RFID reader ID label has a maximum overall dimension 50mm×27mm. It is printed on 0.125mm velvet polycarbonate with a 3M 468MP adhesive backing or equivalent. A 42mm×14mm clear window is left in the main label and behind this a paper label with the reader serial number, model number, date of manufacture, country of manufacture, FCC ID and Industry Canada ID number is fitted.

An example of the paper label design is shown below:

The product is too small to enable the compliance statement to be included. The text is provided in the user manual of the final product.
