

Wiflyer Label Location

On the bottom of the product is a recess approximately 61mm x 43mm into which is attached the main product label, containing the approval information, plus the company name, product name, location of manufacture, etc. This recess has a cut off corner so the label can only be fitted in one orientation.

Also on the bottom of the product is a recess approximately 61mm x 5mm into which is attached the serial number and MAC address of the product. Both will be in numeric and bar code formats. This recess has a cut off corner so the label can only be fitted in one orientation.
